

Product Data Sheet

Upright 26 cu. ft. Solid Door Refrigerator, High Performance -Certified to NSF/ANSI 456 Standard for Vaccine Storage

LHE-26-SD-PHNSF

Product Description

These cutting-edge pharmacy refrigerators are certified in accordance with the NSF/ANSI 456 Standard for Vaccine Storage. With this certification, units protect pharmaceuticals at optimal temperatures, preventing waste and allowing for peak delivery. Our premium line includes features such as extensive alarm systems and digital touch pad displays.

These solid door refrigerators utilize microprocessor controllers and feature temperature alarms, remote alarm contacts, and probe access ports with included probes. Units run on natural, hydrocarbon refrigerant for environmental health and energy efficiency.

General Description and Application					
Description	Single Solid Door Pharmacy/Vaccine Upright Refrigerator				
Operational environment	Indoor use only, +18°C to +26°C (+65°F to +78°F), <70% RH				
Storage capacity	26 cu. ft. gross volume				
Door	One swing solid door, self-closing, right hinged, non-reversible, magnetic sealed gasket, keye lock				
Shelves	Seven shelves (six adjustable/one fixed) with guard rail on back				
Mounting	3 1/2" Swivel Casters (two locking)				
Interior lighting	Shielded, switched LED lighting, full coverage, balanced spectrum				
Airflow management	Forced Air technology, patent pending				
External probe access	access Rear wall port (3/4") dia.				
Insulation	Cabinet is foamed-in-place with EPA compliant high density urethane foam				
Exterior materials	White powder coated steel				
Access control	Pyxis®, Omnicell® and AcuDose RX® compatible				
General warranty	Two (2) years parts and labor warranty, excluding display probe calibration				
Compressor warranty	Five (5) years compressor warranty				
Product Weight	Five (5) years compressor warranty 241				
Shipping Weight	241 281				
Rated Amperage	3				
Power Plug/Power Cord	NEMA 5-15 plug, 8 to 10 ft typical, conforms to UL471 requirements, Vaccine Storage power cord warning label				
Facility Electrical Requirement	110-120V AC: 15 A (minimum)				
Agency Listing and Certification	Certified with the temperature performance requirements as defined in the NSF/ANSI 456 Standard for Vaccine Storage for all testing scenarios. UL, C-UL, ETL, C-ETL listed and certified to UL471 standard, hydrocarbon refrigerant safety, Energy Star Certified				
Included Accessories	Temperature Monitor Device - Complies with The Current CDC Guidelines,3 Years Certification Of Calibration, "Buffered" Probe In The Product Simulated Solution, Min/Max Memory, *F/*C Switchable, Field Installable, And Visual & Audible Temperature Alarms				

Pharmacy refrigerator/freezer toolkit and temperature logs

Refrigeration System

Compressor Refrigerant Condenser Evaporator Defrost Hermetic, high performance EPA SNAP compliant, R290, propane Fin and tube design, high efficiency fan Fin and tube design, high efficiency fan Cycle optimized, zero energy

Performance

Uniformity ¹ (Cabinet air)	+/- 0.7°C
Stability ² (Cabinet air)	+/- 0.5°C
Maximum temperature variation (Cabinet air)	+/-0.9°C
Temperature rise after 8 sec door openings	Temperature did not exceed 7.1°C at any probe for all required NSF/ANSI 456 testing protocols ³
Recovery after 3 min door opening	All probes recover to under 8°C within 8 min.
Energy consumption	1.68 KWh/day ⁴
Average heat rejection	2.62 KWh/day (372 BTU/h) ⁴
Noise pressure level (dBA)	49 or less installed
Pull down time to 4°C nominal operating	30 min
temp	

Controller Configuration Alarms and Monitoring

controller, configuration, Alarms and Monitoring						
Controller technology	Parametric, microprocessor, LED display with 0.1°C resolution					
Display technology	NSF/ANSI 456 Standard for Vaccine Storage compliant digital temperature display and ala module with battery back-up.					
Temperature setpoint range	1°C to 10°C (Controller settings must remain unaltered to ensure thermal performance compliant with NSF/ANSI 456 Standard for Vaccine Storage requirements)					
Display probe	Calibrated, stainless steel					
External alarm connection	State switching remote alarm contacts					
	Visual and audible indicators					
Alarms	High / Low temperature, compliant with alarm requirements defined in the NSF/ANSI 456 Standard for Vaccine Storage					
Simulator ballast	Glass bead thermal media					

Performance data acquired at 22°C ambient, using NSF/ANSI 456 compliant validation ballast probes, empty chamber, during stabilized steady state operation and a DAQ sampling rate of one measurement every 10 seconds

1 - Uniformity is defined as the maximum variance in temperature across all probes at any point in time over the testing period

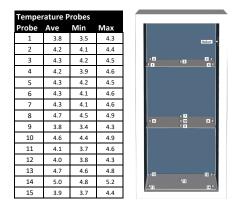

2 - Stability is defined as the maximum variance in temperature experienced by any single probe over the testing period

3 - Temperature performance for all loaded and unloaded door opening protocols, all alarm, controller and probe requirements as defined in the NSF/ANSI 456 standard for vaccine storage

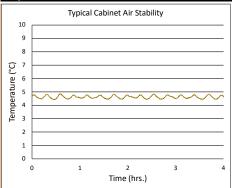

4 - Data per Energy Star test results or equivalent testing and calculation. Heat rejection based on daily averages, not continuous operation. Performance exceeds Energy Star requirements.

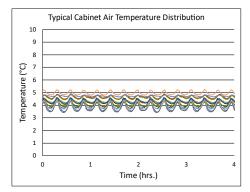

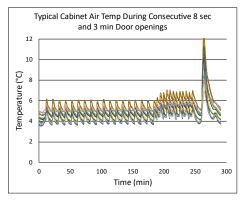

*-one or more of these certifications may apply to this unit.
