

LHE-49-SD-PHNSF

These cutting-edge pharmacy refrigerators are certified in accordance with the NSF/ANSI 456 Standard for Vaccine Storage. With this certification, units protect pharmaceuticals at optimal temperatures, preventing waste and allowing for peak delivery. Our premium line includes features such as extensive alarm systems and digital touch pad displays.

These solid door refrigerators utilize microprocessor controllers and feature temperature alarms, remote alarm contacts, and probe access ports with included probes. Units run on natural, hydrocarbon refrigerant for environmental health and energy efficiency.

General Description and Application

Double Solid Door Pharmacy/Vaccine Upright Refrigerator Description Operational environment Indoor use only, +18°C to +26°C (+65°F to +78°F), <70% RH

Storage capacity 49 cu. ft. gross volume

Door

Two swing solid doors, self-closing, non-reversible, magnetic sealed gaskets, keyed locks

Fourteen shelves (twelve adjustable/two fixed) with guard rail on back

3 1/2" Swivel Casters (two locking)

Shielded, switched LED lighting, full coverage, balanced spectrum Interior lighting

Forced Air technology, patent pending Airflow management

External probe access Rear wall port (3/4") dia.

Insulation Cabinet is foamed-in-place with EPA compliant high density urethane foam

Exterior materials White powder coated steel

Pyxis®, Omnicell® and AcuDose RX® compatible Access control

Two (2) years parts and labor warranty, excluding display probe calibration

Five (5) years compressor warranty Compressor warranty

402 Product Weight 452 Shipping Weight

Rated Amperage 4 5 Amns

Power Plug/Power Cord NEMA 5-15 plug, 8 to 10 ft typical, conforms to UL471 requirements, Vaccine Storage power

cord warning label

Facility Electrical Requirement

Agency Listing and Certification Certified with the temperature performance requirements as defined in the NSF/ANSI 456 $\,$

Standard for Vaccine Storage for all testing scenarios. UL, C-UL, ETL, C-ETL listed and certified

to UL471 standard, hydrocarbon refrigerant safety, Energy Star Certified

Temperature Monitor Device - Complies with The Current CDC Guidelines.3 Years Certification Of Calibration, "Buffered" Probe In The Product Simulated Solution, Min/Max Memory, °F/°C

Temperature did not exceed 6.0°C at any probe for all required NSF/ANSI 456 testing protocols³

Switchable, Field Installable, And Visual & Audible Temperature Alarms

Pharmacy refrigerator/freezer toolkit and temperature logs

Refrigeration System

Included Accessories

Hermetic, high performance EPA SNAP compliant, R290, propane Refrigerant Condenser Fin and tube design, high efficiency fan Fin and tube design, high efficiency fan Defrost Cycle optimized, zero energy

Uniformity¹ (Cabinet air) +/- 1.0°C Stability² (Cabinet air) +/- 0.9°C Maximum temperature variation +/-1.2°C (Cabinet air)

Temperature rise after 8 sec door

Alarms

Simulator ballast

All probes recover to under 8°C within 6.5 min.

Recovery after 3 min door opening Energy consumption

1.45 KWh/dav⁴ 3.15 KWh/day (448 BTU/h)4 Average heat rejection Noise pressure level (dBA) 48 or less installed

Pull down time to 4°C nominal operating

Controller, Configuration, Alarms and Monitoring

Parametric, microprocessor, LED display with 0.1°C resolution Controller technology Display technology

NSF/ANSI 456 Standard for Vaccine Storage compliant digital temperature display and alarm

module with battery back-up.

1°C to 10°C (Controller settings must remain unaltered to ensure thermal performance Temperature setpoint range compliant with NSF/ANSI 456 Standard for Vaccine Storage requirements)

State switching remote alarm contacts External alarm connection

Visual and audible indicators

High / Low temperature, compliant with alarm requirements defined in the NSF/ANSI 456

Standard for Vaccine Storage Glass bead thermal media

Performance data acquired at 22°C ambient, using NSF/ANSI 456 compliant validation ballast probes, empty chamber, during stabilized steady state operation and a DAQ sampling rate of one measurement every 10 seconds

- 1 Uniformity is defined as the maximum variance in temperature across all probes at any point in time over the testing period
- 2 Stability is defined as the maximum variance in temperature experienced by any single probe over the testing period
- 3 Temperature performance for all loaded and unloaded door opening protocols, all alarm, controller and probe requirements as defined in the NSF/ANSI 456 standard for vaccine storage
- 4 Data per Energy Star test results or equivalent testing and calculation. Heat rejection based on daily averages, not continuous operation. Performance exceeds Energy Star requirements.

Product Data Sheet

Upright 49cu. ft. Solid Door Refrigerator, High Performance -Certified to NSF/ANSI 456 Standard for Vaccine Storage

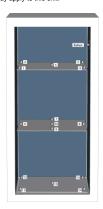

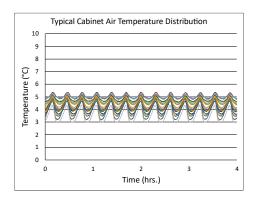

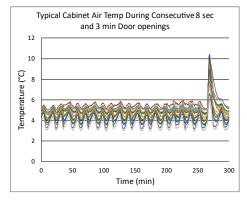

*-one or more of these certifications may apply to this unit.

Temperature Probes								
Probe	Ave	Min	Max					
1	4.0	3.4	4.9					
2	4.7	4.3	5.2					
3	4.8	4.5	5.2 5.1 4.9					
4	4.2	3.5
